

Innovative Educational Learning

A Manifesto for the 'Just'
School of Tomorrow.

The General Definition

The "Just" School

An innovative school must be effective for everyone.

Valorize individual differences.

Support unique **Life Projects.**

Invest in the **citizens of tomorrow.**

Innovation Signifies Movement

**“Innovation is a constant tension
the development of quality.”**

It is not the search for a new gadget, but the continuous attempt to improve educational processes.

Strategic Actions to Foster Pedagogy

The Framework for Innovation.

Objectives

Stimulate the capacity to set and pursue clear goals.

Transparency

Explicitly explain objectives and evaluation methods.

Mobilization

Favor the mobilization of different competencies (Interdisciplinarity).

The Digital Strategy

Promote a critical and conscientious use

Innovation is not just about using digital tools. It requires a specific mindset: using digital instruments critically and with full awareness of their impact.

A KEY CONCEPT

TINKERING

Learning by Doing.

The Tinkering Approach

Experimentation

Students are encouraged to experiment physically and intellectually.

Problem Solving

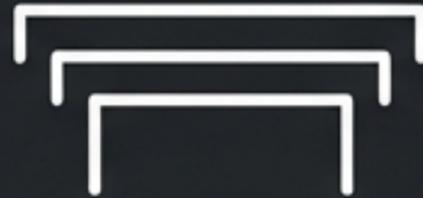

Students are stimulated to actively solve problems.

Application in Human Sciences

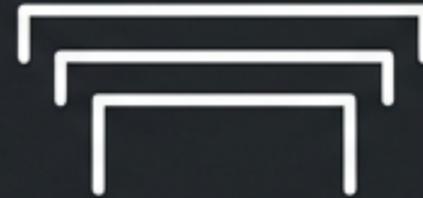

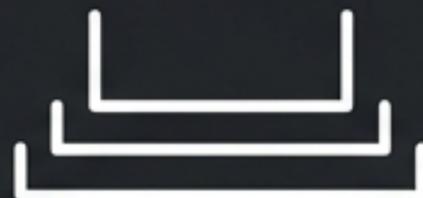

An innovative approach recommended even for non-technical disciplines.

The Architecture of Innovation

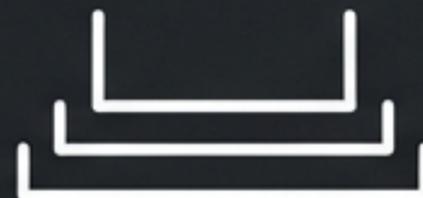

The Vision

A "Just" School
(Equity & Life
Projects)

The Mindset

Movement
(Constant tension
toward quality)

The Method

Tinkering
(Learning by
doing)

"Trust in the educational investment for the citizens of tomorrow."
